

FINAL PROGRAM

EXPLORING BORDERS
meet your neighbours

**REGIONAL MEETING OF THE
INTERNATIONAL ASSOCIATION OF
PAEDIATRIC DENTISTRY (IAPD)**

23 & 24 NOVEMBER 2018 | Evoluon - Eindhoven, The Netherlands

www.nvdk.org

WORD OF WELCOME

The Dutch Association of Paediatric Dentistry (NVvK) has the great honor to welcome you at the first IAPD Tri-Regional Meeting in the Netherlands. This meeting is organized in consultation with both the Belgian Academy of Paediatric Dentistry (BAPD) and the German Society of Paediatric Dentistry (DGKIZ).

The theme of this conference, “Exploring Borders; meet your neighbours”, is an illustration of the trinity of the organizing committee. However, you will experience that this theme will be expressed in many other ways during this congress. Within Paediatric and Special Care dentistry, borders and limitations are often met or exceeded. Regarding, for example, behaviour and cooperation of the child, regarding technical possibilities, prevention, regulations or scientific evidence. We should open our eyes for our neighbouring colleagues, share experiences and learn from each other instead of judging the unknown.

During this congress, various topics will be intensively discussed by high profile and renowned international speakers. In the continuation with the theme, neighbours will meet each other on stage and discuss certain themes from different perspectives, various cultural backgrounds and other scientific evidence or clinical experience. Several workshops are scheduled to practice new materials and devices or to go deeper into the subject matter of the keynote lecture. Young scientists will expose their research and share scientific/clinical experiences and ideas.

It gives us great pleasure that you are here to join us on our trip to exceed the boundaries of our comfortzone, to learn to accept and respect borders of yourself and others and to share experiences with your neighbours.

Enjoy this Intergalactic Paediatric Dental Experience in the Evuon in Eindhoven!

On behalf of the organizing committee,
Martine van Gemert-Schriks
President

GENERAL INFORMATION

SDF+KI

= SMART DESENSITIZING AGENT

RIVA STAR

Two years and beyond
desensitizing effect

Clinical studies support the immediate effect of Riva Star and its long term effect of over two years.

RIVA STAR

Increasing bond
strengths of GICs

Pre-treating tooth surfaces with Riva Star is a great way to enhance bonding of glass ionomers to dentin.

RIVA STAR

Patented procedure

Unlike other silver fluoride systems, Riva Star's two step patented procedure minimizes the risk of staining. By applying the potassium iodide solution over the silver fluoride solution, a silver iodide precipitate is formed.
